

Our Lettuce Plants are Seeding!

We plan to let our plants go to seed, following we will collect the seeds to store away or plant, so we can grow more of the same variety further down the track.

This will help with our sustainability of our garden so we can keep growing a natural organic garden.

Feel free to pick the leaves as this will encourage the plant to grow new ones and therefore more edible lettuce leaves.

But, if you see our plants seeding, let them, we will collect the seeds when they are ready to be collected.
